

Let Daston Transform Your Technology with Google Solutions

Seamlessly Integrate Google Solutions from Daston for Public and Private Sector Organizations.

Daston Corporation, a Google Cloud Premier and SBA Certified HUBZone Small Business that specializes in providing Google Cloud Licensing and Google Certified Professional Support Services. Daston has a highly experienced team of in-house Google Cloud certified experts who can assist US Public Sector Agencies, Commercial Organizations, and Educational Institutions in utilizing Google solutions for their organizations.

With Daston's expert assistance, organizations can optimize Google solutions to maximize ROI, and receive full cradle-to-grave deployment and migration services. Daston has a proven track record of delivering Google Cloud solutions to hundreds of Federal and State and Local government agencies across the US. Daston has been selected as a Google Partner of the Year (2021,2022) Public Sector and listed on Inc. Fast 5000 list of top companies (2022,2023). Daston is also a State of Virginia SWAM vendor.

Why Daston?

Key Differentiators

Our Impact

- Google Cloud Premier Partner, SBA Certified HUBZone Small Business, and Google Partner of the Year Award winner (Public Sector) in 2021 and 2022.
- Committed to regional, national partnerships and diversity, designated as a State of Virginia SWAM vendor.

- Accelerates customers' time to value through its Workspace Transformation Solution.
- Award-winning change management team ensures seamless transition for end-users.
- Four-step methodology (Discovery, Implementation, Validation, Project Handoff) for efficient adoption.

- Well-positioned to drive positive change in technology transformation.
- Reliable and forward-thinking partner for comprehensive and effective digital transformation.
- Committed to client success and data security in the ever-evolving private and public sector landscape.

By choosing Daston, you're not just opting for a service; you're partnering with a team that prioritizes your success. Trust us to leverage Google's proven tools, providing you with a customized, secure, and efficient collaboration environment that aligns seamlessly with your specific requirements. Your success is our priority, and Daston is here to empower your journey with innovation and expertise.

Google Workspace

Experience elevated collaboration with Google Workspace, offering a unified platform for seamless communication and productivity. Gmail, Calendar, Drive, and Meet empower real-time collaboration, facilitating enhanced efficiency and teamwork.

Google Voice

Experience elevated collaboration with Google Workspace, offering a unified platform for seamless communication and productivity. Gmail, Calendar, Drive, and Meet empower real-time collaboration, facilitating enhanced efficiency and teamwork.

BeyondCorp Enterprise (BCE)

BeyondCorp redefines security with a zero-trust model, safeguarding corporate applications and data across devices, locations, and networks. Utilizing identity and device management, encryption, and continuous authorization, it ensures secure access, eliminating the need for traditional perimeter-based security controls.

apigee

Apigee, a comprehensive API management platform, empowers organizations to securely design, deploy, and manage Application Programming Interfaces (APIs) throughout their entire lifecycle.

Google Cloud Platform

Unlock digital transformation with Google Cloud Platform, emphasizing data democratization, app, and infrastructure modernization, seamless people connection, and trusted transactions. Enjoy secure access, breaking free from traditional perimeter-based security controls.

Gemini

Experience elevated collaboration with Google Workspace, offering a unified platform for seamless communication and productivity. Gmail, Calendar, Drive, and Meet empower real-time collaboration, facilitating enhanced efficiency and teamwork.

Chronicle

A cutting-edge cybersecurity platform, employs machine learning and analytics to swiftly detect and investigate security threats within an organization's network. By aggregating and analyzing extensive telemetry data, it grants security teams comprehensive visibility, facilitating rapid and effective threat response.

reCAPTCHA

Google's reCAPTCHA protects websites by verifying user identity, using advanced risk analysis algorithms and machine learning to assess the likelihood of a user being a bot. When the risk score is high, users are prompted to solve a challenge, enhancing both website security and user experience.

Additional Solutions: In addition to the Google Solutions outlined above, we also offer:

Why Daston is Your Trusted Google Partner

As a certified premier Google partner, Daston leverages extensive experience in tailoring Google's secure, cloud-based collaboration tools for companies and agencies. This customization enhances productivity, performance, and fosters a competitive edge. With a deep understanding of Google products, Daston assists public and private sector organizations in achieving these benefits. We specialize in designing and implementing innovative solutions for your business challenges. Moreover, Daston provides expertise in FedRAMP, ensuring compliance with security standards for cloud products and services used by federal agencies, facilitating swift innovation while meeting rigorous security requirements at appropriate risk impact levels.
