Established in 1992, Daston Corporation is a premier IT consulting and services company renowned for superior customer service and exceptional quality. Since 2008, Daston has been a Google Solutions Premier Partner, specializing in Google Workspace Solutions, Cloud Licensing, and Google Certified Professional Support Services. Our proven track record demonstrates our ability to deliver successful Google solutions to federal, state, and local government agencies, as well as commercial clients nationwide.

We offer a wide range of Google-specific professional services, staffed by a team of experts who ensure compliance with major U.S. public sector requirements, including CJIS, HIPAA, ITAR, FEDRAMP, NIST 800-171, NIST 800-53, NIST 800-34, CMMC, DFARS, ISO 9001:2015, ISO 27001, ISO 27017, and ISO 27018. Our secure approach adheres to all relevant government regulations. Our secure approach adheres to all relevant government regulations including Executive Order 14028, Improving Nation's Cybersecurity.

Our Google professional services encompass cloud platform strategy and implementation, change management, business analytics and more. We assist organizations in harnessing the full potential of Google's suite of solutions, ensuring secure networks with BeyondCorp's zero-trust approach and enhancing communication with tools such as Google Meet and Google Voice.

Whether you are a government agency or a commercial enterprise, our experts will guide you through every step, from assessment and design to implementation, training, and support. With Daston, you can unlock the power of Google technologies and transform your organization.

Google Workspace

Daston can be your one-stop shop for a seamless and successful Google Workspace implementation. We offer a comprehensive suite of professional services to support your organization throughout the entire Google Workspace lifecycle, from initial planning to ongoing administration. Daston's comprehensive suite of services is tailored to empower organizations in leveraging the full capabilities of Google Workspace.

Strategic Planning and Collaboration:

- Conduct a thorough needs assessment to identify unique organizational requirements and aspirations for Google Workspace adoption.
- Collaborate with stakeholders to define a clear vision and roadmap for successful implementation.
- Develop a comprehensive change management strategy that addresses potential challenges and resistance, ensuring a smooth transition for employees.

Streamlined Administration and Management:

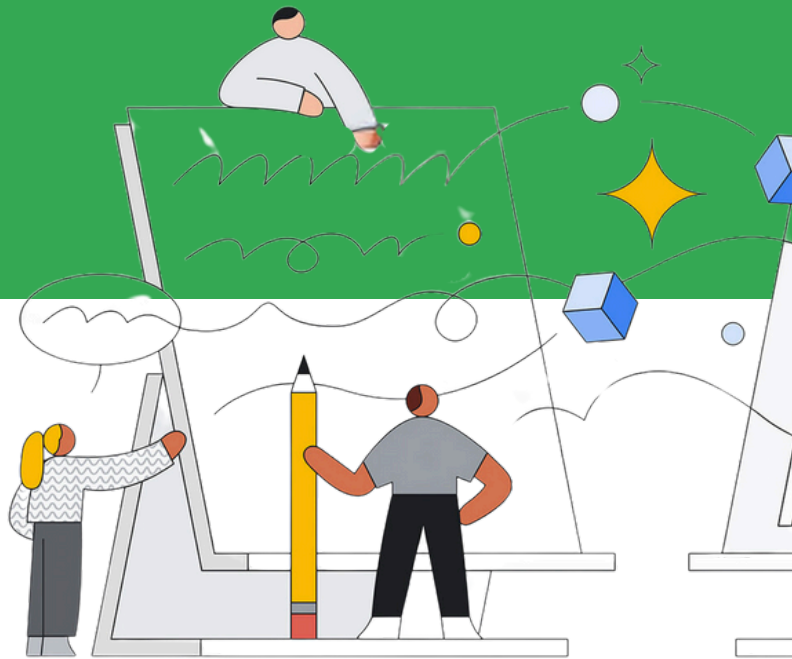

- Establish administrative best practices to ensure efficient management of Google Workspace.
- Provide guidance on setting up user accounts, managing groups, and configuring security settings.
- Leverage automation tools and optimization techniques to streamline administrative tasks and minimize manual interventions.
- Regular monitoring and reporting to measure the effectiveness of Google Workspace implementation and identify areas for improvement.

Expert Implementation and Configuration:

- Leverage technical expertise to plan and execute the implementation of Google Workspace, ensuring seamless integration with existing systems.
- Provide guidance on selecting the appropriate Google Workspace editions and features based on organizational needs.
- Assist in data migration from legacy systems, ensuring minimal disruption and preserving data integrity.

Comprehensive Training and User Enablement:

- Design targeted training programs tailored to different user roles and responsibilities, maximizing adoption and proficiency.
- Utilize a blended learning approach, combining instructor-led sessions, e-learning modules, and hands-on exercises.
- Offer ongoing support and resources to address user queries, foster continuous learning, and maintain high engagement levels.

Daston empowers businesses to unlock the full potential of Gemini, Google's advanced AI assistant. Our services encompass maximizing Gemini's functionalities, automating tasks to boost productivity, and fostering seamless collaboration through Workspace integration. Daston's Gemini experts can also guide data-driven decision making, craft impactful presentations, and maintain a professional virtual presence. Additionally, we ensure smooth deployment, integration with existing workflows, and provide ongoing support to ensure your success with Gemini.

Maximize Gemini's Capabilities:

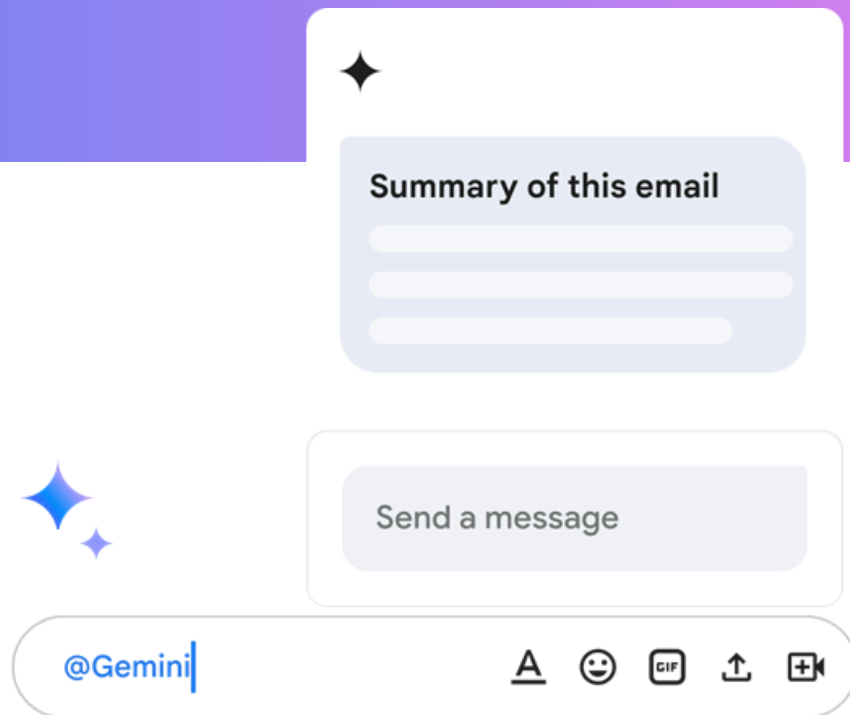

- Our team of certified specialists will guide you through Gemini's functionalities, ensuring you leverage its full potential. We'll help you customize workflows and settings to best suit your specific needs, across various departments like sales, marketing, and research.

Boost Efficiency and Productivity:

- We'll help you automate repetitive tasks like email drafting, summarizing, and information gathering. This frees up valuable time for your employees to focus on strategic initiatives.

Enhance Communication and Collaboration:

- Gemini's AI-powered features facilitate smoother communication within your teams. We'll help you integrate Gemini with existing Google Workspace tools like Gmail and Calendar, fostering seamless collaboration.

Drive Data-Driven Decisions:

- Gemini excels at research and analysis. Our experts will guide you on utilizing Gemini to uncover trends, synthesize information, and identify valuable business opportunities hidden within your data.

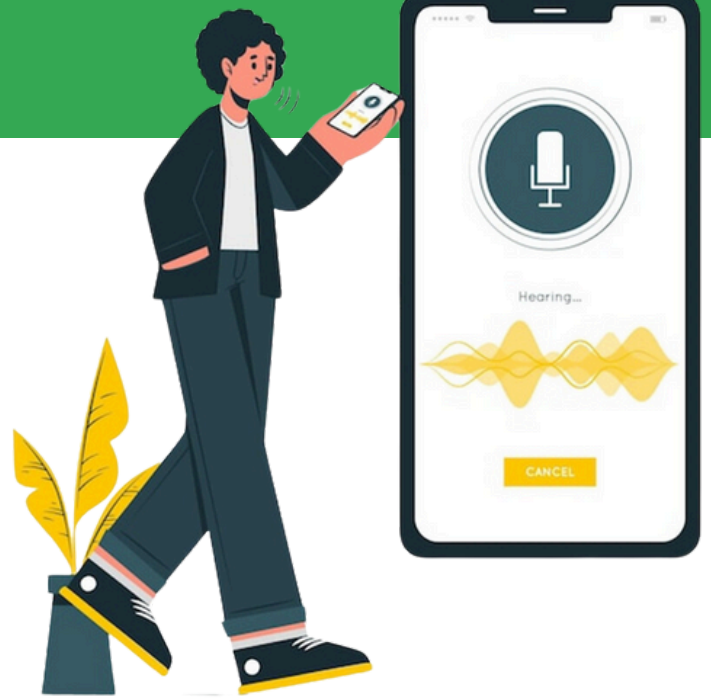

Craft Compelling Presentations:

- Leave a lasting impression with stunning presentations. We'll show you how to leverage Gemini's creative capabilities to generate impactful visuals and designs, right at your fingertips.

Maintain a Professional Virtual Presence:

- Project a polished image during video meetings. We'll demonstrate how Gemini's background effects can create a professional backdrop, eliminating distractions and enhancing your video conferencing experience.

Daston's Google Voice professional services empower businesses to unlock the full potential of this communication tool. Their experts can tailor Google Voice functionalities to seamlessly integrate with existing workflows, enhancing its usability. Additionally, Daston prioritizes security by implementing best practices to safeguard data and ensure compliance with regulations. Our Services Include:

Customization:

- Tailoring Google Voice features to a company's specific needs, potentially involving integrations with other tools.

Security:

- Enhancing the security of Google Voice deployments to ensure compliance and data protection.

Implementation:

- Providing guidance and assistance in setting up and configuring Google Voice for a business.

Training:

- Educating employees on how to best utilize Google Voice functionalities.

Daston offers a range of professional services to help businesses implement, manage, and administer Google Chrome Enterprise. Here's a summary:

Daston guides you through every step of your Chrome Enterprise journey. They begin by analyzing your IT infrastructure and pinpointing areas where Chrome Enterprise can optimize your organization. Following this needs assessment, they design a custom implementation plan.

Daston then takes care of the entire deployment process, seamlessly enrolling devices, configuring policies, and migrating your data. To ensure everyone feels comfortable using Chrome Enterprise effectively, Daston provides comprehensive training for both your IT staff and end-users.

Looking beyond deployment, Daston offers ongoing management and administrative capabilities. This includes:

Security Management:

- Configure security settings to safeguard your devices and data, with assistance in threat monitoring and management.

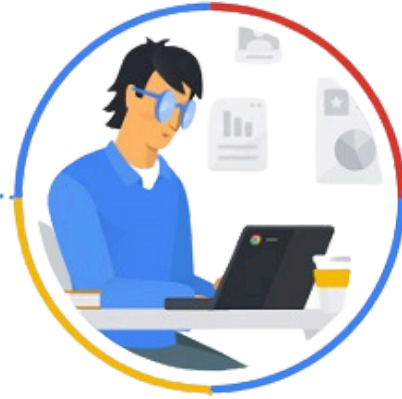

Policy Management:

- Craft and enforce policies to control how Chrome devices are used within your organization, encompassing browser extensions, websites, and applications.

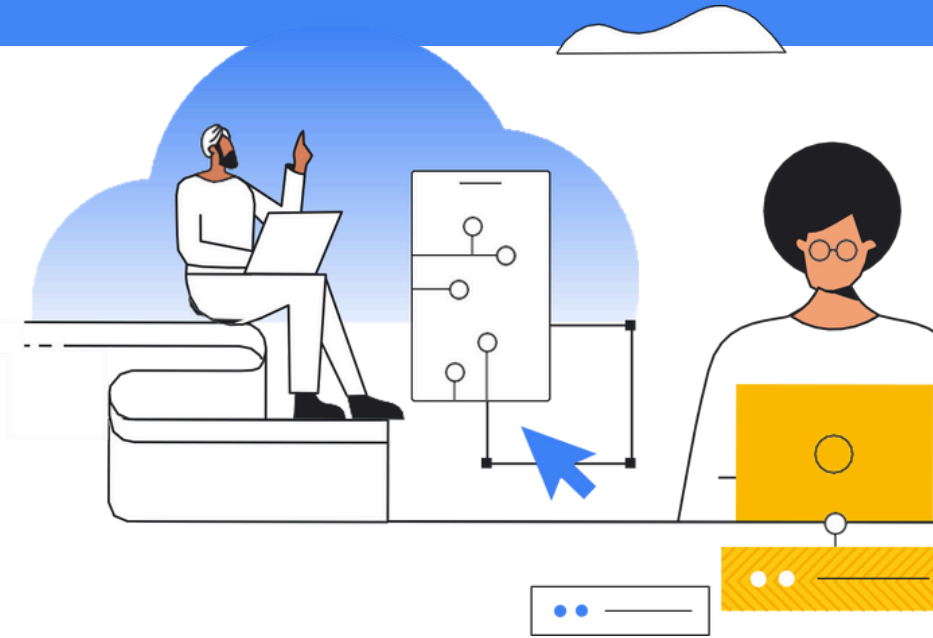

Device Management:

- Simplify device management with features like remote wiping, application deployment, and device health monitoring, all powered by Chrome Enterprise.

Daston's commitment extends to ongoing support, ensuring you have the resources to troubleshoot any issues and keep your Chrome Enterprise deployment running smoothly.

Daston, a Google Cloud Premier Partner, offers comprehensive professional services to guide you through your Google Cloud Platform (GCP) journey. Their certified experts design custom GCP solutions tailored to your specific needs, handling everything from initial requirement analysis and architecture design to implementation. Our services include:

Implementation:

- Daston's certified experts can design a custom GCP solution for your specific needs. This includes analyzing your requirements, designing the architecture, and implementing the chosen GCP services.

Management:

- Daston can manage your GCP environment, taking care of tasks like provisioning resources, monitoring performance, and ensuring security. This frees you to focus on your core business.

Administrative Capabilities:

- Daston can also help with administrative tasks like user management, access control, and billing management. This ensures your GCP environment is set up securely and efficiently.

Daston offers robust Google Security Operations (SECOPS) professional services to bolster your cloud security posture on Google Cloud Platform (GCP). Their team of security specialists integrates seamlessly with your existing operations, providing

Security Strategy and Design:

- Daston collaborates with you to craft a customized security strategy aligned with your business needs and regulatory compliance requirements. They'll design a secure GCP architecture leveraging best practices and Google's native security solutions.

Threat Detection and Response:

- Daston's experts continuously monitor your GCP environment for potential threats and vulnerabilities. They'll implement robust security monitoring tools and processes to identify and swiftly respond to security incidents.

Compliance Management:

- Daston assists you in navigating the complexities of cloud security compliance. They'll help you implement the necessary controls to meet industry standards and regulations.

Security Awareness Training:

- Daston empowers your workforce by providing security awareness training programs. This equips your employees to identify and mitigate security risks within the GCP environment.

Daston empowers organizations to implement and manage Google BeyondCorp, a zero-trust security platform. We guide you through the entire process, ensuring a secure and efficient transition.

Streamlined Implementation:

- **Assessment:** We begin by thoroughly assessing your current security posture, user needs, and application landscape.
- **Tailored Design & Planning:** Leveraging the insights from the assessment, we design a BeyondCorp implementation that perfectly aligns with your specific needs. This includes access controls, user authentication, and seamless integration with your existing systems.
- **Expert Deployment & Configuration:** Our team expertly configures BeyondCorp components like single sign-on, access context manager, and endpoint verification to ensure a smooth rollout.
- **Comprehensive Training & Support:** We equip your IT staff and users with the necessary knowledge through BeyondCorp policy and access procedure training. Additionally, we offer ongoing support to address any questions or challenges you may encounter.

Ongoing Management and Security:

- **User & Device Management:** Daston simplifies user and device management by assisting you in setting up user access controls and enforcing robust device security policies.
- **Granular Access Policy Management:** We collaborate with you to define and manage detailed access policies based on user roles, device trust levels, and specific application access needs.
- **Enhanced Monitoring & Reporting:** Daston provides tools to monitor BeyondCorp activity, identify potential security risks, and generate reports for compliance purposes.
-

By partnering with Daston, you gain a trusted advisor to navigate your BeyondCorp adoption and achieve a more secure and zero-trust access environment.
