

# Scaling Enterprise Intelligence: Google's AI Ecosystem for Government and Enterprise

In an era of rapid digital evolution, government agencies and commercial enterprises must modernize infrastructure to maintain operational agility and public trust. Google's AI portfolio offers a secure, sovereign-ready framework designed to automate complex workflows and extract actionable insights from vast data lakes. This overview breaks down the premier AI solutions designed to empower your workforce: Google Workspace AI Ultra Access, AI Expanded Access and Gemini Enterprise.

## Google Workspace AI Ultra Access: The Pinnacle of Productivity

For organizations seeking to push the boundaries of content creation, research, and coding within their existing workflows, the AI Ultra Access add-on delivers the highest level of Google AI performance.

**Maximum Usage Limits:** Provides the highest access and usage limits to advanced AI features across Workspace, ensuring uninterrupted productivity for high-volume users and preventing disruptions via an optional overage model.

**Professional-Grade Video:** Move from prompt to stunning video in minutes using Veo 3.1, leveraging Google DeepMind's most advanced models for high-fidelity video and clear audio. You also receive the highest access to Flow for cinematic filmmaking capabilities.

**Advanced Research & Coding:** Uncover deep insights with NotebookLM, an AI research partner grounded in your own content. Tackle complex coding tasks with Deep Think and explore agentic automation using Project Mariner.

**Seamless Management:** Easily deploy and centrally manage access to these advanced tools for individual users, groups, or across your entire organization.

## AI Expanded Access: Bridge The Gap Between Basic AI Tools and High-End Research Models.

AI Expanded Access is a strategic middle-tier subscription for Google Workspace, designed to bridge the gap between basic AI tools and high-end research models. Positioned as the "Better" tier for growing teams, it unlocks significantly higher usage limits for advanced features like image and video generation without the extreme cost of the Ultra tier. By moving beyond the daily caps of standard plans, it enables power users—such as marketing teams and operations leaders—to scale their creative and automated workflows directly within the Workspace ecosystem.

**Higher Usage Limits & Automation:** Provides a massive increase in daily prompts and processing power for Gemini models compared to standard Business or Enterprise plans, while also increasing the execution limit for Workspace Studio AI agents and automated "flows" for robust operational scaling.

**NotebookLM Premium:** Multiplies capacity for complex research, offering 5x more sources per notebook and expanded "Audio Overview" generation.

**Nano Banana Pro & Veo Video Generation:** Unlocks professional-grade image generation with higher daily quotas and 4K resolution support for high-fidelity assets, and grants access to advanced Veo 3.1 models, including monthly credits for Flow to create cinematic, high-quality video content.

**Advanced Workspace Tools:** Includes access to upcoming features like real-time speech translation and enhanced AI functions in Google Sheets.

## Gemini Enterprise: The Agentic Automation Platform

While AI Ultra enhances your daily Workspace productivity, Gemini Enterprise is a distinct, enterprise-grade platform built on Google Cloud, designed to scale AI agents across your entire organization.

**Cross-System Orchestration:** Connects data seamlessly across Google Workspace, Microsoft 365, enterprise systems, and cloud infrastructure.

**Governed AI:** Built to serve a different strategic use case, providing a governed platform for enterprise-wide AI agents.

**Organization-Wide Automation:** Focuses on cross-application workflows and the orchestration of AI agents, rather than just individual or team productivity enhancements.

## Google AI Solutions Matrix

Feature / Capability	Workspace Standard / Plus	AI Expanded Access	AI Ultra Access	Gemini Enterprise
<b>Primary Focus</b>	Embedded productivity	Higher AI limits & media	Developer-grade AI & high-volume content	Enterprise-wide AI agents & cross-system automation
<b>Workspace AI Features</b>	Included with defined limits	Higher access	Highest access	N/A (Separate Google Cloud platform)
<b>Video Generation</b>	Standard access	Higher access	Highest access	Standard Access
<b>NotebookLM Capacity</b>	Standard access	Higher access	Highest access	Higher Access
<b>Flow &amp; Project Mariner</b>	Not included	Higher access to Flow	Highest access & 25,000 monthly credits	N/A
<b>Cross-System Connectivity</b>	No	No	No	Connects M365, Workspace, Cloud

# Scaling Innovation Across Government and Enterprise: The Daston Advantage

Deploying advanced AI and cloud infrastructure is not a mere procurement task; it is a strategic evolution. Whether you are a federal agency navigating strict compliance or a commercial enterprise scaling global operations, success requires a partner who masters the intersection of security, sovereignty, and speed.

**Unmatched Expertise:** Daston Corporation stands as a preeminent Google Cloud and Google Workspace Premier Partner, leveraging decades of experience to deliver comprehensive licensing and professional support services.

**Certified Excellence:** Our deep bench of certified experts—including cloud architects and deployment specialists—holds specialized badges in Work Transformation, Security, AI & ML, and Gemini for Government.

**Award-Winning Leadership:** Our excellence in the Google ecosystem is underscored by our status as a three-time U.S. Federal Civilian Google Public Sector Partner of the Year

**Optimized Deployments:** We align technical mastery with your strategic organizational goals, ensuring every Google Cloud deployment is optimized for peak performance and strict security protocols.

In an era of rapid digital transformation, Daston Corporation serves as the architect of your innovation. We manage the complexities of integration so your team can focus on what matters: **delivering results for your constituents and stakeholders.**
